The information in this section was prepared by the Massachusetts State Data Center (MassSDC) at the University of Massachusetts Donahue Institute Economic and Public Policy Research group. It may be relevant in evaluating the economic and financial condition and prospects of the Commonwealth of Massachusetts. The State Data Center archives data about Massachusetts. The economic and demographic data, which have been obtained by the MassSDC from the sources indicated, do not necessarily present all factors that may have a bearing on the Commonwealth's fiscal and economic affairs.

All information is presented on a calendar-year basis unless otherwise indicated. **Information in the text, tables, charts, and graphs is current as of July 15, 2016.** Sources of information are indicated in the text or immediately following the charts and tables, and also in the *Sources* on the last page of the Exhibit A section. Although the Commonwealth considers the sources to be reliable, it makes no independent verification of the information presented herein and therefore does not warrant its accuracy.

Statistical Overview

Population (p. A-2)

	<u>Massachusetts</u>	<u>United States</u>
Estimated Percent Change in Population, July 1, 2010 - July 1, 2015	3.5%	3.9%

Personal Income, Consumer Prices, and Poverty (p. A-8)

Per Capita Personal Income, 2015	\$61,032	\$47,669
Average Annual Pay, All Industries, 2014	\$64,488	\$51,672
Percent Change in CPI-U*, 2014-2015	0.6%	0.1%
Percent Change in CPI-U*, May 2015 - May 2016	1.5%	1.0%
Poverty Rate, 2014	11.6%	15.5%
Average Weekly Earnings, Manufacturing Production Workers: 2015	\$892.98	\$832.42
Percent Change from previous year	1.7%	1.1%

Employment (p. A-18)

Percent Change in Nonfarm Payroll Employment, June 2015 - June 2016 (not seasonally adjusted)	1.4%	1.7%
Unemployment Rate, 2015	5.0%	5.3%
Unemployment Rate, May 2016 (not seasonally adjusted)	3.8%	4.5%

Education (p. A-24)

Expenditure Per Pupil K-12 Public, 2014	\$15,105	\$11,022
Percent of Adults with a Bachelor's Degree or Higher, 2014	41.2%	30.1%

Economic Base and Performance (p. A-30)

Percent Change in Gross Domestic Product, 2014-2015	2.0%	2.4%
Percent Change in International Exports, 2014-2015	-7.8%	-7.4%
Percent Change in Housing Permits Authorized, 2014-2015	20.3%	13.0%

*NOTE: Percent changes in the Consumer Price Index for All Urban Consumers (CPI-U) are for the Boston-Worcester-Lawrence, MA-NH-ME-CT CMSA & the United States. p = preliminary.

Massachusetts is a densely populated state with a well-educated population, comparatively high income levels, and a relatively diversified economy. While the total population of Massachusetts has remained fairly stable in the last 25 years, significant changes have occurred in the age distribution of the population. Dramatic growth in residents between the ages of 20 and 44 since 1980 is expected to lead to a population distributed more heavily in the 65 and over age group in the next 25 years. Just as the working-age population has increased, income levels in Massachusetts since 1980 have grown significantly more than the national average, and a variety of measures of income show that Massachusetts residents have significantly higher amounts of annual income than the national average. These higher levels of income have been accompanied by a consistently lower poverty rate. State unemployment rates have typically remained below the national average with the exception of a slight increase during the recession of the early 1990s and a seventeen-month stretch between 2006 and 2007. More recently, Massachusetts unemployment has hovered closer to the national average and currently stands at 3.8 percent, compared to the national rate of 4.5 percent. In 2014, Massachusetts was ranked second in the U.S. according to the American Human Development Index, modeled after the United Nations Human Development Index, which compares health, income, and education outcomes.

The following five sections provide detailed information on population characteristics, personal income, employment, human resources, economic base and performance, and infrastructure.

POPULATION CHARACTERISTICS

Massachusetts is a relatively slow growing but densely populated state with a comparatively large percentage of its residents living in metropolitan areas. The population density of Massachusetts was estimated as of July 1, 2015 to be 866.6 persons per square mile, as compared to 90.9 for the United States as a whole. Among the 50 states, only Rhode Island and New Jersey have a greater population density. Massachusetts also ranked just behind the same two states, as well as Delaware, in percentage of residents living in metropolitan areas. According to the current county-based definition, 98.5 percent of the state's population live in metropolitan areas.

The state's population is concentrated in its eastern portion. The city of Boston is the largest city in New England, with a July 1, 2015 population estimated at 667,137 or 9.8 percent of the total state population. Boston is the hub of the seven-county Boston-Cambridge-Newton, MA-NH Metropolitan Statistical Area (MSA), which includes the two southeastern New Hampshire counties, and had a total population as of July 1, 2015 estimated at 4,774,321, or 32.4 percent of the total New England population. The Cambridge-Newton-Framingham, MA Metropolitan Division is the largest component of that MSA, with a total population as of July 1, 2015 estimated at 2,361,182, while the Boston, MA Metropolitan division is the second largest component, with a total population estimated at 1,984,537.

The second largest MSA in the state is the Worcester, MA MSA, with a July 1, 2015 population estimated at 935,536. The city of Worcester, situated approximately 40 miles west of Boston with a July 1, 2015 estimated population of 184,815, is the second largest city, both in New England and the state. As a major medical and education center, the Worcester area is home to 18 patient care facilities and 13 colleges and universities, including the University of Massachusetts Medical School.

The third largest MSA in Massachusetts is the three-county Springfield, MA MSA, with a July 1, 2015 population estimated at 631,982. Springfield, the third largest city in the Commonwealth with a July 1, 2015 estimated population of 154,341, is located in the Connecticut River Valley in Western Massachusetts and enjoys a diverse body of corporate employers, the largest of which are Baystate Health Systems, Big Y Supermarkets, Hartford Hospital, and MassMutual Financial Group. In addition, Springfield is home to three independent colleges.

As the following graph and table (on the next page) indicate, the population in Massachusetts has generally grown at a rate similar to the population of New England and more slowly than the nation as a whole. From 2009 to 2015, Massachusetts' growth has more closely resembled that of the U.S. as a whole than that of New England, although growth has slowed somewhat since 2013. According to the Census Bureau's latest revised estimates released in December 2015, the Massachusetts population has only grown by 6.8 percent since Census 2000, while the U.S. has grown 13.9 percent.

Annual Percent Change in Total Population, 1982-2015

SOURCE: U.S. Census Bureau.

NOTE: Figures for all years shown are estimates as of July 1.

The following table compares the population level and percentage change in the population of Massachusetts to the six-state New England region and to the United States.

<i>Population, 1975-2015</i> (in thousands)						
	Massachusetts		New England		United States	
Year	Total	Percent Change	Total	Percent Change	Total	Percent Change
1975	5,758	-0.3%	12,163	0.1%	215,465	1.0%

SOURCE: U.S. Census Bureau.
NOTE: Figures for all years shown are estimates as of July 1.

The next 14 years are expected to bring about a continued change in the age distribution of the Massachusetts population. As the following table and chart show, the share of the 65 and over age group and especially the 85 and over age group will continue to grow. The chart, table, and population pyramids (below, and on the following page) show the projected population by age for Massachusetts for 2000 through 2030. The Census has not updated these projections to reflect the 2010 Census.

<i>Projected Massachusetts Population by Age Group 2000-2030 (in thousands)</i>									
Year	0-4	5-17	18-24	25-44	45-64	65-84	85+	All Ages	Median Age
2000	397.3	1,102.8	579.3	1,989.8	1,419.8	743.5	116.7	6,349.1	36.5
2005	395.1	1,055.6	488.9	1,844.0	1,602.5	693.1	103.7	6,182.9	38.2
2010	400.7	1,083.1	670.2	1,769.7	1,817.1	750.6	158.0	6,649.4	38.8
2015	409.7	1,064.2	656.0	1,746.1	1,857.1	856.5	168.9	6,758.6	39.2
2020	422.3	1,070.9	617.5	1,775.8	1,809.3	987.8	172.0	6,855.5	39.5

Migration. Migration is one of several components of annual population change in Massachusetts. The movement of people from place to place is often linked to economic opportunities or downturns. These data are derived from the filing addresses and number of exemptions submitted with federal tax returns. A tax filer is considered a migrant when he/she files a tax return with an address different from the previous year's filing address. Of the New England states, New Hampshire was the largest net loss for Massachusetts and Connecticut was the largest net gain for Massachusetts from 2000 through 2014. Massachusetts also sends many more migrants to the majority of U.S. states than it gains. Its largest net losses outside of New England are to Florida, California, Texas, and North Carolina, while its largest net gains are from New York and New Jersey. The charts below illustrate the net migration for Massachusetts to and from the New England states and the rest of the country using IRS data.

PERSONAL INCOME, CONSUMER PRICES, AND POVERTY

Personal Income. Real per capita income levels in Massachusetts increased faster than the national average between 1992 and 1997. In 2000, Massachusetts had its highest per capita income growth in 16 years, exceeding the national growth rate by 2.5 percentage points. From 2001 to 2003, real income declined in Massachusetts while staying roughly flat for the nation. However, real income levels in Massachusetts remained well above the national average. Following a significant decline in 2009, Massachusetts, New England, and the U.S. steadily increased until 2012. However, from 2006 to 2012, Massachusetts personal income either declined more slowly, or grew more quickly, than the nation during the recession and its aftermath. Only the District of Columbia and Connecticut have had higher levels of per capita personal income. In 2013, Massachusetts, New England and the U.S. all experienced a slight decline in real income. Most recently, the 2015 Massachusetts per capita personal income remains higher than New England and the nation as a whole.

The following graph illustrates these changes in real per capita personal income in Massachusetts, New England, and the United States since 1970.

The following table compares per capita personal income in Massachusetts, New England, and the United States for the period 1970-2015.

<i>Per Capita Personal Income, 1970-2015</i>									
Year	Nominal Income (in nominal dollars)			Real Income (in 2015 dollars)			Percent Change in Real Income		
	MA	N.E.	U.S.	MA	N.E.	U.S.	MA	N.E.	U.S.

NOTE: Using midyear population estimates from the Census Bureau and two CPI-U series from the U.S. Bureau of Labor Statistics for price inflation.

Average Annual Pay. Massachusetts saw steady growth in average annual pay for most of the past fifteen years, adjusted for inflation. It lost ground in 2009, but resumed growth in 2010. Payroll data are reported to the Quarterly Census of Employment and Wages (QCEW) by all employers covered under the Unemployment Insurance programs, and summary data are released. Average annual pay is computed by dividing the total annual payroll of employees covered by Unemployment Insurance programs by the average monthly number of employees from the data in the QCEW. Since 2005, average annual wages in the state have grown at an annual rate of 0.9 percent, compared to 0.8 percent for the nation. The level of average annual pay in Massachusetts in 2014 was 24.8 percent higher than the national average: \$64,488 compared to \$51,672.

Annual Wage and Salary Disbursements. Wage and salary disbursements by place of work is a component of personal income and measures monetary disbursements to employees. This includes compensation of corporate officers, commissions, tips, bonuses, and receipts in-kind. Although the data are recorded on a place-of-work basis, they are then adjusted to a place-of-residence basis so that the personal income of the recipients whose place of residence differs from their place of work will be correctly assigned to their state of residence. The table below details Wage and Salary Disbursements since 1990. Between 1998 and 2000, the Massachusetts share of New England and overall U.S. totals increased. In subsequent years, the Massachusetts share of New England and the U.S. decreased slightly until 2006. Since then, Massachusetts' share of New England has risen steadily while its share of the U.S. has stayed roughly the same. In 2015, the shares were 52.4 and 3.0 percent respectively .

SOURCE: U.S. Bureau of Economic Analysis. Data were presented in previous quarters in nominal dollars but are now presented adjusted for inflation.

Consumer Prices. Higher income levels in Massachusetts relative to the rest of the United States are offset to some extent by the higher cost of living in Massachusetts. The following graph presents consumer price trends for the Boston metropolitan area and the United States for the period between May 2005 and May 2016. The latest available data for May 2016 show that the CPI-U for Boston area increased at a rate of 1.5 percent over May 2015. The U.S. index increased at a rate of 1.0 percent over the same period.

In 2009, the Boston metropolitan area and U.S. experienced their first monthly year-over-year declines in the CPI-U since 1954 and 1955, respectively. The 2015 U.S. CPI-U increased 8.7 percent since 2010 while Boston's CPI-U increased 8.1 percent during that period. Between 2014 and 2015, Boston's CPI increased by 0.6 percent while in the United States as a whole, CPI-U only increased by 0.1%, the smallest change since before the recession. The table on the following page shows the annual average of the Consumer Price Index for All Urban Consumers (CPI-U) and the percentage change in that average from the previous year from 1970 through the present.

Consumer Confidence, Present Situation, and Future Expectations. These three measures offer multiple insights into consumer attitudes. The U.S. measures are compiled from a national monthly survey of 5,000 households and are published by The Conference Board, Inc. The survey for Massachusetts is conducted in a similar manner and the results are published by MassInsight, based on quarterly polling of 450 adult residents of Massachusetts. The "Present Situation" index measures consumers' appraisal of business and employment conditions at the time of the survey. The "Future Expectations" index focuses on consumers' expectations for six months hence regarding business and employment conditions, as well as expected family income. The overall "Consumer Confidence" index is a weighted average of the two sub-indices. Although the U.S. measures are compiled by a different source than the Massachusetts measures, according to the Federal Reserve Bank of Boston, the numbers are generally comparable. A score of 100 is considered neutral.

According to the Conference Board, consumer confidence nationally reached a six-year high of 111.9 in July 2007, followed by an all-time low of 25.3 in February 2009. The Massachusetts index has generally been higher than the U.S. index since sharing lows in January 2009, except for a brief period when they tracked closely together in 2011 and then experienced slight dips in July 2013 and July 2014.

In the first quarter of 2016, Consumer Confidence for Massachusetts reached 117.0, down from a 15-year high of 121.0 one quarter before. MassInsight has not yet released data past that quarter. The U.S. had yet to recover to its 2007 levels and stood at 94.7 in the second quarter of 2016. The following graph and table detail the recent record of these measures.

MassInsight Corporation (for MA measures, not seasonally adjusted).

Poverty. Since 2005, the Massachusetts poverty rate, which was 11.6 percent in 2014, has been three to four percentage points lower than the national average, which was 15.5 percent in 2014. Massachusetts ranked 42nd out of the 50 states and the District of Columbia in 2014, for percent of persons whose ratio of income to the poverty level was below 100 percent in the past 12 months. Poverty status is not determined for all people. Institutionalized people, people in military quarters, people in college dormitories, and unrelated individuals under 15 years old are excluded.

Transfer Payments. Transfer payment income is payment to individuals from all levels of government and from businesses for which no current services are performed, including payments to nonprofit institutions serving individuals. These payments accounted for 14.9 percent of total personal income in Massachusetts in 2014, dropping from 15.0 percent in 2013. The chart below does not include transfer payments from businesses or payments to non-profit organizations. Total transfer payments to individuals in Massachusetts from governments and businesses totaled \$59.0 billion for 2014, adjusted for inflation. Fifty-one percent of government transfer payments to individuals were medical payments, up from over 48.4 percent in 2013.

***Transfer Payments from Governments to Individuals in
Massachusetts in 2014***
(From Annual State Personal Income Estimates)
(in thousands of 2015 dollars)

SOURCE: U.S. Bureau of Economic Analysis, Annual State Personal Income Estimates.

NOTE: The category "other" includes veterans' benefit payments, federal education and training assistance payments, and a small residual of miscellaneous other payments to individuals. Data were presented in previous quarters in nominal dollars but are now presented adjusted for inflation.

Health Insurance Coverage. Massachusetts leads the nation in the percent of individuals with health insurance coverage. Massachusetts passed legislation in 2006 mandating universal coverage in the Commonwealth. In 2014, 96.7 percent of the civilian non-institutionalized population was covered in the state by either private or public insurance, compared with 88.3 percent nationwide. Massachusetts also leads the other New England states in coverage, with Vermont as the next closest at 95.0 percent. All of the New England states have higher rates of coverage than the nation. These data do not indicate the comprehensiveness of coverage, however.

EMPLOYMENT

Employment by Industry. The chart on this page shows the annual level of non-agricultural payroll employment in Massachusetts based on the North American Industry Classification System (NAICS) for the seven largest NAICS supersectors starting with 1990, the earliest year for which NAICS data are available. The chart on the following page compares the supersector shares for 2015 with the corresponding shares for 1995. Like many industrial states, Massachusetts has seen a steady decline of its manufacturing jobs base over the last two decades, not only as a share of total employment, but in absolute numbers of jobs as well. Several NAICS service sectors, Education and Health Services, Professional and Business Services, and Leisure and Hospitality have grown to take the place of manufacturing in driving the Massachusetts economy and now account for almost half of total payroll employment, while Financial Activities, Government, Information, and Trade, Transportation & Utilities have remained relatively level or declined in share.

After significant declines from 2002 to 2004, total non-agricultural employment in Massachusetts eventually increased 0.6 percent in 2005 and continued to increase every year through 2008. After a large dip in 2009, employment has continued to grow steadily with nonfarm employment increasing 1.7 percent in 2015. With an annual average just under 3.5 million nonfarm employees, 2015 had the highest numbers to date.

After years of moderate but steady declines or near-zero growth in the late nineties and early 2000s, manufacturing employment in the state experienced steep annual declines in 2002 (10.2 percent) and 2003 (7.0 percent) before returning to more moderate declines in 2004 (3.5 percent). After a steep drop of 9.5 percent in 2009, the decline returned to a less dramatic 2.4 percent in 2010. June 2016 saw manufacturing employment decrease by 0.5 percent since June of 2015. The 2015 employment total was slightly higher than 2014 (250.3 thousand compared to 250.2).

Largest Employers in Massachusetts. The following inset lists the 25 largest private employers in Massachusetts based upon employment covered by the Unemployment Insurance system for March 2015. The 2015 list is identical in ranking to the 2014 list. As noted, the list may not include some employers who do business in the state under multiple legal names or register each facility as a separate employer.

Twenty-Five Largest Private Employers in Massachusetts in March 2015

(listed alphabetically)

Baystate Medical Center, Inc.	Raytheon Company
Beth Israel Deaconess Medical Center	Shaw's Supermarkets, Inc.
Boston Medical Center Corporation	Southcoast Hospitals Group, Inc.
Boston University	State Street Bank & Trust Company
Brigham & Women's Hospital, Inc.	Target Corporation
CVS Pharmacy, LLC	The Children's Hospital Corporation
Demoulas Super Markets, Inc.	The Stop & Shop Supermarkets Corporation
E.M.C. Corporation	Tufts University
General Hospital Corporation	UMass Memorial Medical Center
Harvard University	United Parcel Service, Inc.
Home Depot U.S.A., Inc.	Wal-Mart Associates, Inc.
Massachusetts Institute of Technology	Whole Foods Market Group
Partners Healthcare Systems, Inc.	

NOTE: This alphabetic listing includes private employers reporting large numbers of jobs covered by the MA unemployment insurance program. The information is based on the March 2015 employment for employers as registered for unemployment insurance. The list may not include those employers who do business in Massachusetts under multiple legal corporations and those who register each store, facility or franchise as a separate employer.

Massachusetts Companies in the Fortune 500 List. As of June 2016, Massachusetts is home to twelve Fortune 500 companies headquartered here, the same twelve as in 2015. When comparing the 2016 Fortune 500 list to the 2015 list, eleven Massachusetts companies gained and one lost rank. Biogen located in Weston, climbed 35 places on the list, the largest leap for a Massachusetts company, while Waltham-based Global Partners fell 93 places.

Massachusetts Companies in the 2016 Fortune 500

Rank		Company (location)	Industry	2016 revenues (billions)
2016	2015			
73	78	Liberty Mutual Ins. Group (Boston)	Insurance: P & C (stock)	\$39.4
76	94	Mass. Mutual Life Ins. (Springfield)	Insurance: Life, Health (mutual)	\$38.2
89	103	TJX (Framingham)	Specialty Retailers: Apparel	\$30.9
113	121	EMC (Hopkinton)	Computer Peripherals	\$24.7
120	129	Raytheon (Waltham)	Aerospace and Defense	\$23.2
132	133	Staples (Framingham)	Specialty Retailers: Other	\$21.0
164	181	Thermo Fisher Scientific (Waltham)	Scientific, Photo, Control Equipment	\$17.0
263	298	Biogen Idec (Weston)	Pharmaceuticals	\$10.8
264	278	State St. Corp. (Boston)	Commercial Banks	\$10.8
273	180	Global Partners (Waltham)	Wholesalers: Diversified	\$10.3
343	367	Eversource (Springfield)	Utilities: Gas and Electric	\$8.0
359	378	Boston Scientific (Natick)	Medical Products & Equipment	\$7.5

SOURCE: *Forbes*, 06/06/2016 issue.

Unemployment Insurance Trust Fund. The unemployment insurance system is a federal-state cooperative program established by the Social Security Act and the Federal Unemployment Tax Act to provide for the payment of benefits to eligible individuals when they become unemployed through no fault of their own. Benefits are paid from the Commonwealth's Unemployment Insurance Trust Fund, financed through employer contributions. The assets and liabilities of the Commonwealth Unemployment Insurance Trust Fund are not assets and liabilities of the Commonwealth.

As of May 2016, the preliminary Massachusetts Unemployment Trust Fund had a balance of \$1.133 billion. This balance is the sum of the private contributory account balance of \$1.019 billion and the government contributory account balance of \$114 million. This compares to the April 30, 2016 balance of \$718.9 million with a private contributory portion of \$604.4 million. The May 2016 Unemployment Insurance Trust Fund report indicated that the private contributory account balance was estimated to be \$1.032 billion by the end of 2020 according to the Moody's-based outlook.

Unemployment. The unemployment rate in Massachusetts was consistently below or equal to the national average from mid-1995 through September 2005, with similar patterns of gradual improvement after the mid-2003 peak. The Massachusetts rate was greater than or equal to the U.S. rate for 19 months between January 2006 and June 2007, but has not exceeded the U.S. rate since then. The Massachusetts rate peaked at 9.6 percent in January 2010, the same month that the U.S. rate peaked at 10.6 percent. From July 2007 onward, the state rate remained equal to or below the comparable (not seasonally adjusted) U.S. unemployment rate.

Since reaching 6.8 percent in January 2014, the Massachusetts unemployment rate has gradually declined to 3.8 percent in May 2016, 0.7 percent below the national rate of 4.5 percent and the lowest level in over a decade. The tables and graphs on the following two pages compare the unemployment rate in the state with those in New England and the U.S.

Annual Average Civilian Labor Force and Unemployment, 1969-2015

EDUCATION AND TECHNOLOGY

Educational Attainment. The availability of a skilled and well-educated population is an important resource for the Commonwealth. Only the District of Columbia had a higher percentage of adults with a bachelor's degree or higher in 2014, according to the Census Bureau's American Community Survey (ACS). The Census also reported that Massachusetts ranked 30th in persons who had not completed high school, at 10.3 percent of the population aged 25 or more, less than the national average of 13.1. Massachusetts' black and Hispanic populations achieved college degrees at a lower rate than its white population but their rates were higher than their national averages. The most current ACS data are shown below.

SOURCE: U.S. Census Bureau, American Community Survey.

Higher Education Data. The table below compares Massachusetts residents' higher education enrollment by race and Hispanic origin to the U.S. There were 1.3 percent fewer people enrolled in college in the U.S. in 2014 compared to 2013. This was a statistically significant change from 2013. Total enrollment in Massachusetts remained relatively unchanged.

<i>Higher Education Enrollment by Race and Hispanic Origin in 2014</i>						
	Total	White alone	Black alone	Asian alone	All other races	Hispanic or Latino
United States	22,994,851	67.8%	15.1%	8.2%	9.0%	16.4%
Massachusetts	588,870	72.7%	9.2%	10.4%	7.6%	10.4%

SOURCE: U.S. Census Bureau, American Community Survey, 2014 1-Year Estimates.

Survey data released by the Institute of International Education state that 55,447 foreign students were enrolled in Massachusetts colleges and universities in the 2014/2015 school year. This was an increase of 8.2 percent from the previous year. The national enrollment increased 10.0 percent. Massachusetts remains fourth ranked among states for foreign student enrollment.

U.S. Department of Education data show that from 2013 to 2014, higher education enrollment decreased 0.8 percent in the United States and 0.6 percent at Massachusetts institutions. During the 2000-2014 period, enrollment in public higher education increased 25 percent in the United States and 23 percent at Massachusetts institutions. Enrollment in private institutions increased 56 percent in the United States and 20 percent at Massachusetts institutions.

Research and development expenditures at universities and colleges increased 41 percent in the United States and 60 percent in Massachusetts between 2005 and 2014.

Internet Access. Massachusetts is tied for seventh highest household internet subscription rate in the U.S. according to the Census Bureau's 2014 American Community Survey.

Patents. The U.S. Patent and Trademark Office notes: “This report shows the number of U.S. patent documents (i.e., utility patents, design patents, plant patents, reissue patents, defensive publications, and statutory invention registrations) granted since 1977, broken down by the state or country of origin (patent origin is determined by the residence of the first-named inventor).”

In 2015, Massachusetts was fourth among all states for the number of new patents issued. Only six nations originated more U.S. patents than Massachusetts, putting the state on par with Canada for origination of U.S. patents. Since 1977, Massachusetts has received more new patents than any other New England state. With 6,777 new patents in 2015, a 0.8 percent increase since 2014, Massachusetts innovators were responsible for 63 percent of the new patents in New England.

Primary and Secondary Education Expenditures. Massachusetts has spent from 16.5 to 37.0 percent more per pupil on primary and secondary education than the national average since 1994. During the 2013-2014 school year, the average Massachusetts per student expenditures increased 2.3 percent to \$15,105. Massachusetts was ranked 8th in the nation among states and the District of Columbia in 2014. The table and chart below show expenditures per pupil for Massachusetts and the U.S.

<i>Per Pupil Expenditure in Public Elementary and Secondary Schools</i> (in 2015 adjusted dollars)				
Fiscal Year	Massachusetts	United States	Ratio (MA/U.S.)	MA change from previous year
1994	\$10,244	\$8,567	1.20	
1995	\$9,940	\$8,534	1.16	-3.0%
1996	\$10,440	\$8,534	1.22	5.0%

National Assessment of Educational Progress (NAEP) scores. The National Assessment of Educational Progress (NAEP), also known as "the Nation's Report Card," is the only nationally representative and continuing assessment of what America's students know and can do in various subject areas. Since 1969, assessments have been conducted periodically in reading, mathematics, science, writing, U.S. history, civics, geography, and the arts. Under the current structure, the Commissioner of Education Statistics, who heads the National Center for Education Statistics in the U.S. Department of Education, is responsible by law for administering the NAEP project.

Since 1990, NAEP assessments have also been conducted to give results for participating states. Those that choose to participate receive assessment results that report on the performance of students in that state. In its content, the state assessment is identical to the assessment conducted nationally. However, because the national NAEP samples were not and are not currently designed to support the reporting of accurate and representative state-level results, separate representative samples of students are selected for each participating jurisdiction/state. The graphs below compare the data available for Massachusetts and the national public samples.

ECONOMIC BASE AND PERFORMANCE—STATE OVERVIEW

Comparing BEA GDP for the U.S., the region, and Massachusetts. The U.S. Bureau of Economic Analysis (BEA) defines Gross Domestic Product by State (GDP) as “the value added in production by the labor and property located in a state. GDP for a state is derived as the sum of the gross state product originating in all industries in a state. In concept, an industry's GDP, referred to as its "value added", is equivalent to its gross output (sales or receipts and other operating income, commodity taxes, and inventory change) minus its intermediate inputs (consumption of goods and services purchased from other U.S. industries or imported).”

The BEA provides national (in January) and state (in June) annual and quarterly GDP estimates. *MassBenchmarks* releases quarterly estimates of Massachusetts economic activity. This is reported in the following section. While we do not have access to many of the components that BEA uses to calculate state GDP in advance of its release, we provide an overview of our state's components when they are available. Additionally, we provide state economic indexes and industrial sector data that are released more frequently and in some cases, are among the components used to calculate state GDP.

State Gross Domestic Product - Annual Change (in billions of chained 2009 dollars)						
Year	Massachusetts		New England		United States	
	GDP	Annual change	GDP	Annual change	GDP	Annual change
2000	\$348		\$720		\$12,625	
2001	\$351	1.0%	\$728	1.1%	\$12,744	0.9%
2002	\$353	0.5%	\$734	0.8%	\$12,971	1.8%
2003	\$362	2.5%	\$754	2.6%	\$13,304	2.6%

NOTE: Shaded areas are recession periods.

ECONOMIC BASE AND PERFORMANCE—ECONOMIC INDICATORS

State Coincident Indexes. To track more recent changes in the state and national economies, we use the Federal Reserve Bank of Philadelphia's Coincident Indexes. It:

...produces a monthly coincident index for each of the 50 states. The indexes are released a few days after the Bureau of Labor Statistics (BLS) releases the employment data for the states.

The coincident indexes combine four state-level indicators to summarize current economic conditions in a single statistic. The four state-level variables in each coincident index are nonfarm payroll employment, average hours worked in manufacturing, the unemployment rate, and wage and salary disbursements deflated by the consumer price index (U.S. city average). The trend for each state's index is set to the trend of its gross domestic product (GDP), so long term growth in the state's index matches long term growth in its GDP. (<https://www.phil.frb.org/research-and-data/regional-economy/indexes/coincident/>)

The graph below indicates the state and national index change from 12 months prior. Recent revisions to BLS data the Philadelphia Federal Reserve Bank uses to construct its indexes resulted in an improved trend for Massachusetts since the recession ended in 2009. The table below compares the Massachusetts index to its New England neighbors and the U.S.

Comparing the U.S. and New England States Coincident Indexes

Area	March 2016	1-Month Change	3-Month Change	12-Month Change
U.S.	177.7	0.2%	0.7%	3.0%
Massachusetts	197.8	0.4%	0.9%	4.4%
Connecticut	167.9	0.3%	0.9%	3.6%
Maine	146.7	-0.1%	0.0%	3.1%
New Hampshire	206.3	0.1%	0.4%	3.4%
Rhode Island	171.8	0.0%	0.2%	3.1%

Comparing the U.S. and Massachusetts Coincident Indexes

SOURCE: Federal Reserve Bank of Philadelphia. April 2016.

NOTES: Shaded areas are recession periods. Indexes are set to 100 at July 1992.

Institute for Supply Management Purchasing Manager Indexes (PMI). These indexes are compiled using survey data from purchasing and supply executives and are used as a leading business indicator. While the national index is based on a survey of manufacturers, the Boston region's is based on a survey of "companies representing industries as diverse as the banking and financial services, pharmaceuticals and biotechnology, software development and communication, medical products and equipment, computers, chemicals, consumer products, education, and the public sector." **It should be noted that the Boston survey has been suspended, and consequently, data from it are not currently being updated.**

Index readings above 50 indicate the economy is generally expanding. Readings below 50 indicate the economy is generally contracting, although a reading above 42 for a period of time indicates the economy is generally expanding. Components of the national index include new orders, production, employment, supplier deliveries, inventories, customer inventories, prices, backlog of orders, exports and imports. The Boston region's components are slightly different and include new orders, production, employment, supplier deliveries, raw monthly materials inventory, business confidence, commodity prices, product prices, new export orders, order backlog and finished goods inventories. These components show which segments of the business supply chain are expanding or contracting.

The June 2016 national index indicated that the manufacturing sector has been expanding since December 2015, with the exception of a small dip in April 2016. The Boston region's June 2015 (the last date for which data were available) index of 32.3 indicated that overall business conditions were contracting after hitting a four-year high of 58.5 in November 2014.

ECONOMIC BASE AND PERFORMANCE—INTERNATIONAL TRADE

Total Trade Volume. Total trade volume, exports and imports, decreased 4.9 percent from 2014 to \$58.9 billion in 2015. Canada trade volume was \$10.9 billion and at 18.5 percent of the total state trade, was by far our most valuable trading partner. Massachusetts trade deficit, \$8.4 billion, grew 17.1 percent in 2015. See appendix 8 for more trade data.

Exports. Massachusetts ranked 19th in the United States in 2015 and first in New England with \$25.3 billion in exports. This was a 7.8 percent decrease from the previous year's export value, while national exports decreased by 7.4 percent. Total exports from New England decreased by 6.7 percent. Canada was again our top export destination in 2015 with \$3.2 billion.

Imports. Imports decreased 2.6 percent to \$33.7 billion in 2015. Canada was also the largest source for Massachusetts imports in 2015, from which we imported \$7.7 billion or 22.9 percent of our total.

ECONOMIC BASE AND PERFORMANCE—INDUSTRY SECTOR DETAIL (NAICS BASIS)

The Massachusetts economy remains diversified among several industrial and non-industrial sectors. The four largest sectors of the economy, real estate, rental and leasing; professional and technical services; government; and manufacturing, contributed 47.1 percent of the GDP in 2015. The real estate, rental and leasing sector remained the largest contributor in 2015. The following bar chart displays the latest sector contributions to the Massachusetts GDP.

NAICS Sector Composition of Massachusetts Gross Domestic Product 2015*
(as a percent of total GDP in chained 2009 dollars)

SOURCE: U.S. Bureau of Economic Analysis.

NOTES: Blue bar indicates positive change from previous year and red is a negative change. Transportation and warehousing excludes U.S. Post Office.

*North American Industry Classification System.

GDP Subsectors. When measured in chained 2009 dollars, the change in Massachusetts total GDP grew 13.5 percent between 2004 and 2014. Between 2004 and 2014 (the latest data available for subsector data), several industries grew much faster than the state average. Industry subsectors that experienced substantial cumulative growth or reduction are listed in the following chart.

Industry Subsectors with a Substantial Growth or Reduction
(chained 2009 dollars)

NAICS* Industry Subsector	Percent change 2004-2014
Water transportation	174%
Computer systems design and related services	123%
Computer and electronic products manufacturing	84%
Petroleum and coal products manufacturing	-60%
Publishing industries, except Internet (includes software)	58%
Warehousing and storage	50%
Textile mills and textile product mills	-49%
Other transportation equipment manufacturing	-47%

SOURCE: U.S. Bureau of Economic Analysis.

NOTES: Updated January 2016. Subsector represents at least a half percent of Massachusetts GDP in the latest year.

*North American Industry Classification System.

Industry Sector Analysis. The following section contains a summary for each of the twenty major NAICS* sectors. The data series show a ten-year time span. Graphs include data value labels for the latest annual points.

Not all datasets are reported for all of the major NAICS sectors. The Massachusetts Department of Workforce and Labor Development's Employment and Wages (ES-202) data series are available for every sector and contain the number of establishments, average monthly employment, total annual wages and average weekly wages for the establishments with employees. The data are reported quarterly and annually for employees in the private, federal government, state government, and local government sectors. **NOTE:** Beginning with the first quarter 2013, a code change for employees from private households (NAICS 814110) into services for the elderly and persons with disabilities (NAICS 624120) moved 33,960 employees in Massachusetts in January 2013.

The nonemployer businesses and receipts graph uses the U.S. Census Nonemployer Statistics series and is available for every sector except 55 - Management of Companies and Enterprises and 92 - Public Administration. Some sectors also lack subsector (at the four-digit NAICS level) detail. Nonemployer annual data have a two-year reporting lag for businesses that do not have paid employees and are subject to federal income tax. The Census reports that "Nonemployers account for a majority of all business establishments, but average less than four percent of all sales or receipts." These can be second or part-time businesses and not the owner's primary source of income.

State Gross Domestic Product is an annual series from the U.S. Bureau of Economic Analysis's Regional Economic Accounts. For more information, please visit:

http://www.bea.gov/newsreleases/regional/gdp_state/qgsp_newsrelease.htm

Foreign exports from the U.S. Census Bureau's Foreign Trade Division and WISERTrade, are available for four industries on a monthly basis. Total state exports are available on a monthly basis. Sector exports and the top ten export destinations for this industry sector are by dollar value.

Each sector analysis has a summary at the bottom of each page. The summary provides (when available):

1. GDP contribution to state total: this sector's GDP divided by the state's total GDP. A green figure in the text at the bottom of the page indicates it is larger than the previous year's GDP contribution. Red indicates it is smaller than the previous year's and black indicates no change from the previous year's GDP contribution.
2. GDP rank: this sector's GDP rank versus all state sectors. A green figure in the text at the bottom of the page indicates that it is higher than the previous year's rank. Red indicates that it is lower than the previous year's and black indicates that there was no change from the previous year's GDP rank.
3. Nonemployer to employer establishment ratio: the number of nonemployer establishments divided by the number of establishments with employers. In general, a ratio greater than one means there are more small businesses. A number less than one means there are more large businesses.
4. Establishments with employees: the subsector with the largest number of establishments who have employees.
5. Nonemployer establishments: the subsector with the largest number of establishments that do not have employees.
6. Employees: the subsector with the largest number of employees, at establishments with employees.
7. Annual wages: the subsector with the largest total annual wages, at establishments with employees.
8. Average weekly wage: the subsector with the largest average weekly wage, at establishments with employees.
9. Annual receipts at nonemployer establishments: the subsector with the most receipts, at establishments that do not have employees.
10. Most valuable export: the subsector export with the highest dollar value.

*North American Industry Classification System.

Note: Total Wage, Average Weekly Wage, Nonemployer Receipts, and Sector Exports are all inflation-adjusted to 2015. State Gross Domestic Product is also adjusted for inflation, but chained to 2009.

NAICS 11 - Agriculture, Forestry, Fishing & Hunting. The Agriculture, Forestry, Fishing and Hunting sector comprises establishments primarily engaged in growing crops, raising animals, harvesting timber, and harvesting fish and other animals from a farm, ranch, or their natural habitats.

Summary.

GDP contribution to state total: **0.1%**

GDP rank: **19 of 20**

Nonemployer to employer establishment ratio: **4.8 to 1**

Sector leaders. Industry subsectors with the majority of establishments, employees, payroll and receipts.

Establishments with employees: **Fishing**

Nonemployer establishments: **Fishing**

Employees: **Greenhouse and nursery production**

Annual wages: **Fishing**

Average weekly wage: **Fishing**

Annual receipts at nonemployer establishments: **Fishing**

Most valuable export: **Fish, fresh, chilled or other frozen marine products**

*For this 2-digit industry, Nonemployer data are available only for 113-115 (Forestry, fishing & hunting & agricultural support services).

NAICS 21 – Mining. The Mining, Quarrying, and Oil and Gas Extraction sector comprises establishments that extract naturally occurring mineral solids, such as coal and ores; liquid minerals, such as crude petroleum; and gases, such as natural gas. The term mining is used in the broad sense to include quarrying, well operations, beneficiating (e.g., crushing, screening, washing, and flotation), and other preparation customarily performed at the mine site, or as a part of mining activity.

Summary.

GDP contribution to state total: **0.04%**

GDP rank: **20 of 20**

Nonemployer to employer establishment ratio: **0.9 to 1**

Sector leaders. Industry subsectors with the majority of establishments, employees, payroll and receipts.

Establishments with employees: **Nonmetallic mineral mining and quarrying**

Nonemployer establishments: **Nonmetallic mineral mining and quarrying**

Employees: **Nonmetallic mineral mining and quarrying**

Annual wages: **Nonmetallic mineral mining and quarrying**

Average weekly wage: **Oil and gas extraction**

Annual receipts at nonemployer establishments: **Nonmetallic mineral mining and quarrying**

Most valuable export: **Minerals and ores**

NAICS 22 – Utilities. The Utilities sector comprises establishments engaged in the provision of the following utility services: electric power, natural gas, steam supply, water supply, and sewage removal. See the appendix, pages five and six for supplemental tables regarding electricity generation, supply and capacity.

State export data are not available for this sector.

Summary.

GDP contribution to state total: **1.1%**

GDP rank: **17 of 20**

Nonemployer to employer establishment ratio: **1.2 to 1**

Sector leaders. Industry subsectors with the majority of establishments, employees, payroll and receipts.

Establishments with employees: **Power generation and supply**

Nonemployer establishments: Subsector detail N/A

Employees: **Power generation and supply**

Annual wages: **Power generation and supply**

Average weekly wage: **Power generation and supply**

Annual receipts at nonemployer establishments: Subsector detail N/A

NAICS 23 – Construction. The Construction sector comprises establishments primarily engaged in the construction of buildings or engineering projects (e.g., highways and utility systems). Establishments primarily engaged in the preparation of sites for new construction and establishments primarily engaged in subdividing land for sale as building sites also are included in this sector. See the appendix pages two through four for housing permits, housing sales, and housing sale prices.

State export data are not available for this sector.

Summary.

GDP contribution to state total: **3.7%**

GDP rank: **10 of 20**

Nonemployer to employer establishment ratio: **2.9 to 1**

Sector leaders. Industry subsectors with the majority of establishments, employees, payroll and receipts.

Establishments with employees: **Building equipment contractors**

Nonemployer establishments: **Building finishing contractors**

Employees: **Building equipment contractors**

Annual wages: **Building equipment contractors**

Average weekly wage: **Utility system construction**

Annual receipts at nonemployer establishments: **Residential building construction**

Large employers in Massachusetts: **Suffolk Construction Company, J&S Electric Company, R.H. White Company and Interstate Electrical Services Group.**

NAICS 31-33 – Manufacturing. The Manufacturing sector comprises establishments engaged in the mechanical, physical, or chemical transformation of materials, substances, or components into new products. The assembling of component parts of manufactured products is considered manufacturing, except in cases where the activity is appropriately classified in Sector 23, Construction.

Summary.

GDP contribution to state total: **10.5%**

GDP rank: **4 of 20**

Nonemployer to employer establishment ratio: **0.9 to 1**

Sector leaders. Industry subsectors with the majority of establishments, employees, payroll and receipts.

Establishments with employees: **Printing and related support activities**

Nonemployer establishments: **Other miscellaneous manufacturing**

Employees: **Electronic instrument manufacturing**

Annual wages: **Electronic instrument manufacturing**

Average weekly wage: **Computers and peripheral equipment**

Annual receipts at nonemployer establishments: **Other miscellaneous manufacturing**

Most valuable export: **Computers and electronic products**

NAICS 42 - Wholesale Trade. The Wholesale Trade sector comprises establishments engaged in wholesaling merchandise, generally without transformation, and rendering services incidental to the sale of merchandise. The merchandise described in this sector includes the outputs of agriculture, mining, manufacturing, and certain information industries, such as publishing. The wholesaling process is an intermediate step in the distribution of merchandise.

State export data are not available for this sector.

Summary.

GDP contribution to state total: **5.1%**

GDP rank: **8 of 20**

Nonemployer to employer establishment ratio: **0.5 to 1**

Sector leaders. Industry subsectors with the majority of establishments, employees, payroll and receipts.

Establishments with employees: **Electronic markets and agents/brokers**

Nonemployer establishments: **Miscellaneous durable goods merchant wholesalers**

Employees: **Electronic markets and agents/brokers**

Annual wages: **Electronic markets and agents/brokers**

Average weekly wage: **Druggists' goods merchant wholesalers**

Annual receipts at nonemployer establishments: **Miscellaneous durable goods merchant wholesalers**

NAICS 44-45 - Retail Trade. The Retail Trade sector comprises establishments engaged in retailing merchandise, generally without transformation, and rendering services incidental to the sale of merchandise. The retailing process is the final step in the distribution of merchandise; retailers are therefore organized to sell merchandise in small quantities to the general public. This sector comprises two main types of retailers: store and nonstore retailers.

State export data are not available for this sector.

Summary.

GDP contribution to state total: **4.3%**

GDP rank: **9 of 20**

Nonemployer to employer establishment ratio: **1.2 to 1**

Sector leaders. Industry subsectors with the majority of establishments, employees, payroll and receipts.

Establishments with employees: **Grocery stores**

Nonemployer establishments: **Direct selling establishments**

Employees: **Grocery stores**

Annual wages: **Grocery stores**

Average weekly wage: **Electronic shopping and mail-order houses**

Annual receipts at nonemployer establishments: **Direct selling establishments**

NAICS 48-49 - Transportation and Warehousing. The Transportation and Warehousing sector includes industries providing transportation of passengers and cargo, warehousing and storage for goods, scenic and sightseeing transportation, and support activities related to modes of transportation. Establishments in these industries use transportation equipment or transportation related facilities as a productive asset. The type of equipment depends on the mode of transportation. The modes of transportation are air, rail, water, road, and pipeline. See pages six and seven of the appendix for more information regarding transportation and warehousing.

State export data are not available for this sector.

Summary.

GDP contribution to state total: **1.5%**

GDP rank: **16 of 20**

Nonemployer to employer establishment ratio: **5.5 to 1**

Sector leaders. Industry subsectors with the majority of establishments, employees, payroll and receipts.

Establishments with employees: **General freight trucking**

Nonemployer establishments: **Taxi and limousine service**

Employees: **Couriers**

Annual wages: **Warehousing and storage**

Average weekly wage: **Pipeline transportation of natural gas**

Annual receipts at nonemployer establishments: **General freight trucking**

NAICS 51 – Information. The Information sector comprises establishments engaged in the following processes: producing and distributing information and cultural products, providing the means to transmit or distribute these products as well as data or communications, and processing data. In 2014, Information exports of prepackaged software, NAICS code 511, were recoded to the Manufacturing NAICS code 334.

State export data are not available for this sector.

Summary.

GDP contribution to state total: **6.1%**

GDP rank: **7 of 20**

Nonemployer to employer establishment ratio: **1.7 to 1**

Sector leaders. Industry subsectors with the majority of establishments, employees, payroll and receipts.

Establishments with employees: **Other information services**

Nonemployer establishments: **Other information services**

Employees: **Software publishers**

Annual wages: **Software publishers**

Average weekly wage: **Software publishers**

Annual receipts at nonemployer establishments: **Other information services**

Most valuable export: **Prepackaged software**

NAICS 52 - Finance and Insurance. The Finance and Insurance sector comprises establishments primarily engaged in financial transactions (transactions involving the creation, liquidation, or change in ownership of financial assets) and/or in facilitating financial transactions.

State export data are not available for this sector.

Summary.

GDP contribution to state total: **7.8%**

GDP rank: **6 of 20**

Nonemployer to employer establishment ratio: **1.4 to 1**

Sector leaders. Industry subsectors with the majority of establishments, employees, payroll and receipts.

Establishments with employees: **Insurance agencies, brokerages & support**

Nonemployer establishments: **Other financial investment activities**

Employees: **Depository credit intermediation**

Annual wages: **Other financial investment activities**

Average weekly wage: **Security and commodity investment activity**

Annual receipts at nonemployer establishments: **Other financial investment activities**

NAICS 53 - Real Estate and Rental and Leasing. The Real Estate and Rental and Leasing sector comprises establishments primarily engaged in renting, leasing, or otherwise allowing the use of tangible or intangible assets, and establishments providing related services. The major portion of this sector comprises establishments that rent, lease, or otherwise allow the use of their own assets by others. The assets may be tangible, as is the case of real estate and equipment, or intangible, as is the case with patents and trademarks.

State export data are not available for this sector.

Summary.

GDP contribution to state total: **14.1%**

GDP rank: **1 of 20**

Nonemployer to employer establishment ratio: **8.3 to 1**

Sector leaders. Industry subsectors with the majority of establishments, employees, payroll and receipts.

Establishments with employees: **Activities related to real estate**

Nonemployer establishments: **Lessors of real estate**

Employees: **Activities related to real estate**

Annual wages: **Activities related to real estate**

Average weekly wage: **Lessors, nonfinancial intangible assets**

Annual receipts at nonemployer establishments: **Lessors of real estate**

NAICS 54 - Professional and Technical Services. The Professional and Technical Services sector comprises establishments that specialize in performing professional, scientific, and technical activities for others. These activities require a high degree of expertise and training. The establishments in this sector specialize according to expertise and provide these services to clients in a variety of industries - in some cases, to households. Activities performed include: legal advice and representation, accounting, bookkeeping, and payroll services, architectural, engineering, and specialized design services, computer services, consulting services, research services, advertising services, photographic services, translation and interpretation services, veterinary services, and other professional, scientific, and technical services.

State export data are not available for this sector.

Summary.

GDP contribution to state total: **11.8%**

GDP rank: **2 of 20**

Nonemployer to employer establishment ratio: **3.1 to 1**

Sector leaders. Industry subsectors with the majority of establishments, employees, payroll and receipts.

Establishments with employees: **Computer systems design and related services**

Nonemployer establishments: **Other professional, scientific, and technical services**

Employees: **Computer systems design and related services**

Annual wages: **Computer systems design and related services**

Average weekly wage: **Scientific Research and Development Services**

Annual receipts at nonemployer establishments: **Management, scientific, and technical consulting services**

NAICS 55 - Management of Companies and Enterprises. The Management of Companies and Enterprises sector comprises establishments that hold the securities of (or other equity interests in) companies and enterprises for the purpose of owning a controlling interest or influencing management decisions or establishments (except government establishments) that administer, oversee, and manage establishments of the company or enterprise and that normally undertake the strategic or organizational planning and decision making role of the company or enterprise. Establishments that administer, oversee, and manage may hold the securities of the company or enterprise.

State nonemployer and export data are not available for this sector.

Summary.

GDP contribution to state total: 2.9%

GDP rank: 11 of 20

Nonemployer to employer establishment ratio: N/A

Sector leaders. Industry subsectors with the majority of establishments, employees, payroll, and receipts.

Establishments with employees: Subsector detail N/A

Nonemployer establishments: N/A

NAICS 56 - Administrative and Waste Services. The Administrative and Waste Services sector comprises establishments performing routine support activities for the day-to-day operations of other organizations. The establishments in this sector specialize in one or more of these support activities and provide these services to clients in a variety of industries and in some cases, to households. Activities performed include: office administration, hiring and placing of personnel, document preparation and similar clerical services, solicitation, collection, security and surveillance services, cleaning, and waste disposal services.

State export data are not available for this sector.

Summary.

GDP contribution to state total: **2.9%**

GDP rank: **12 of 20**

Nonemployer to employer establishment ratio: **2.9 to 1**

Sector leaders. Industry subsectors with the majority of establishments, employees, payroll and receipts.

Establishments with employees: **Services to buildings and dwellings**

Nonemployer establishments: **Services to buildings and dwellings**

Employees: **Employment services**

Annual wages: **Employment services**

Average weekly wage: **Office administrative services**

Annual receipts at nonemployer establishments: **Services to buildings and dwellings**

NAICS 61 - Educational Services. The Educational Services sector comprises establishments that provide instruction and training in a wide variety of subjects. This instruction and training is provided by specialized establishments, such as schools, colleges, universities, and training centers. These establishments may be privately owned and operated for profit or not for profit, or they may be publicly owned and operated. They may also offer food and/or accommodation services to their students.

State export data are not available for this sector.

Summary.

GDP contribution to state total: 2.7%

GDP rank: 14 of 20

Nonemployer to employer establishment ratio: 5.1 to 1

Sector leaders. Industry subsectors with the majority of establishments, employees, payroll and receipts.

Establishments with employees: **Other schools and instruction**

Nonemployer establishments: Subsector detail N/A

Employees: **Elementary and secondary schools**

Annual wages: **Elementary and secondary schools**

Average weekly wage: **Colleges and universities**

Annual receipts at nonemployer establishments: Subsector detail N/A

NAICS 62 - Health Care and Social Assistance. The Health Care and Social Assistance sector comprises establishments providing health care and social assistance for individuals. The sector includes both health care and social assistance because it is sometimes difficult to distinguish between the boundaries of these two activities. **Note:** Beginning with the first quarter 2013, a code change for employees from private households (NAICS 814110) into services for the elderly and persons with disabilities (NAICS 624120) moved 33,960 employees in Massachusetts in January 2013.

State export data are not available for this sector.

Summary.

GDP contribution to state total: **9.4%**

GDP rank: **5 of 20**

Nonemployer to employer establishment ratio: **0.9 to 1**

Sector leaders. Industry subsectors with the majority of establishments, employees, payroll and receipts.

Establishments with employees: **Individual and Family Services**

Nonemployer establishments: **Offices of other health practitioners**

Employees: **General medical and surgical hospitals**

Annual wages: **General medical and surgical hospitals**

Average weekly wage: **Offices of physicians**

Annual receipts at nonemployer establishments: **Offices of other health practitioners**

NAICS 71 - Arts, Entertainment, and Recreation. The Arts, Entertainment, and Recreation sector includes a wide range of establishments that: operate facilities or provide services to meet varied cultural, entertainment, and recreational interests of their patrons, are involved in producing, promoting, or participating in live performances, events, or exhibits intended for public viewing, preserve and exhibit objects and sites of historical, cultural, or educational interest and operate facilities or provide services that enable patrons to participate in recreational activities or pursue amusement, hobby, and leisure-time interests. See the appendix page six for travel and tourism information.

State export data are not available for this sector.

Summary.

GDP contribution to state total: **1.0%**

GDP rank: **18 of 20**

Nonemployer to employer establishment ratio: **9.3 to 1**

Sector leaders. Industry subsectors with the majority of establishments, employees, payroll and receipts.

Establishments with employees: **Other amusement & recreation industries**

Nonemployer establishments: **Independent artists, writers, and performers**

Employees: **Other amusement & recreation industries**

Annual wages: **Other amusement & recreation industries**

Average weekly wage: **Spectator sports**

Annual receipts at nonemployer establishments: **Independent artists, writers, and performers**

NAICS 72 - Accommodation and Food Services. The Accommodation and Food Services sector comprises establishments providing customers with lodging and/or preparing meals, snacks, and beverages for immediate consumption. The sector includes both accommodation and food services establishments because the two activities are often combined at the same establishment.

State export data are not available for this sector.

Summary.

GDP contribution to state total: 2.7%

GDP rank: **13 of 20**

Nonemployer to employer establishment ratio: **0.3 to 1**

Sector leaders. Industry subsectors with the majority of establishments, employees, payroll and receipts.

Establishments with employees: **Restaurants and other eating places**

Nonemployer establishments: **Special food services**

Employees: **Restaurants and other eating places**

Annual wages: **Restaurants and other eating places**

Average weekly wage: **Traveler accommodation**

Annual receipts at nonemployer establishments: **Restaurants and other eating places**

NAICS 81 - Other Services, Except Public Administration. The Other Services (except Public Administration) sector comprises establishments engaged in providing services not specifically provided for elsewhere in the classification system. Establishments in this sector are primarily engaged in activities such as equipment and machinery repairing, promoting or administering religious activities, grant-making, advocacy, providing dry cleaning and laundry services, personal care services, death care services, pet care services, photofinishing services, temporary parking services, and dating services. **Note:** Beginning with the first quarter 2013, a code change for employees from private households (NAICS 814110) into services for the elderly and persons with disabilities (NAICS 624120) moved 33,960 employees in Massachusetts in January 2013.

State export data are not available for this sector.

Summary.

GDP contribution to state total: **1.8%**

GDP rank: **15 of 20**

Nonemployer to employer establishment ratio: **2.7 to 1**

Sector leaders. Industry subsectors with the majority of establishments, employees, payroll and receipts.

Establishments with employees: **Private households**

Nonemployer establishments: **Other personal services**

Employees: **Personal Care Services**

Annual wages: **Automotive repair and maintenance**

Average weekly wage: **Electronic equipment repair/maintenance**

Annual receipts at nonemployer establishments: **Other personal services**

NAICS 92 - Public Administration. The Public Administration sector consists of establishments of federal, state, and local government agencies that administer, oversee, and manage public programs and have executive, legislative, or judicial authority over other institutions within a given area. These agencies also set policy, create laws, adjudicate civil and criminal legal cases and provide for public safety and national defense.

State nonemployer and export data are not available for this sector.

Summary.

GDP contribution to state total: **10.6%**

GDP rank: **3 of 20**

Nonemployer to employer establishment ratio: N/A

Sector leaders. Industry subsectors with the majority of establishments, employees, payroll and receipts.

Establishments with employees: **Justice, public order, and safety activities**

Nonemployer establishments: N/A

Employees: **Justice, public order, and safety activities**

Annual wages: **Justice, public order, and safety activities**

Average weekly wage: **National security & international affairs**

Annual receipts at nonemployer establishments: N/A

ECONOMIC BASE AND PERFORMANCE—GOVERNMENT REVENUES AND SPENDING

Federal Spending in Massachusetts. Massachusetts received approximately \$58.6 billion in contracts, grants, direct payments, insurance, loans and guarantees, and other spending from the federal government in federal FY 2015. Massachusetts received 2.1 percent of all federal spending in FY 2015 versus 2.5 percent in FY 2014. Federal dollars to Massachusetts have dropped since 2012. Massachusetts federal contracts declined from 2012 to 2014, but increased 5.2 percent in 2015. The proportion of all Massachusetts federal contracts has averaged 2.9 percent over the last eight years.

Change in Federal Spending - U.S. vs. Massachusetts

Federal Spending in the United States and Massachusetts
(in billions of 2015 adjusted dollars)

FFY	Massachusetts	YOY change	United States	YOY change
2008	\$53.3		\$2,294.8	
2009	\$75.9	42.4%	\$3,257.7	42.0%
2010	\$72.8	-4.2%	\$2,701.0	-17.1%
2011	\$66.5	-8.6%	\$3,468.7	28.4%
2012	\$81.4	22.4%	\$3,828.9	10.4%

NOTE: Federal fiscal data reporting is not complete until January of the following year due to the three month lag in DOD reporting. Dollar values and change in dollar values reflect inflation-adjusted (\$2015) dollars. In prior quarters, data for this table were not adjusted for inflation. Beginning this quarter they are reported adjusted to 2015 dollars.

In FFY 2015, the largest portion of federal spending in Massachusetts, 47.1 percent, was for Other Financial Assistance which includes direct payments to individuals (such as Medicare and food stamps), insurance payments (such as unemployment benefits, flood insurance), and other types of assistance payments (such as reimbursements for prescriptions for veterans). Other Financial Assistance decreased 29.1 percent while Contracts increased 5.4 percent from FFY 2014, and Grants increased 5.2 percent. The graphs below describe the most recent complete fiscal year and the last eight years of federal spending in Massachusetts, including the most recent data for the current fiscal year as reported by USASpending.gov.

Federal Spending in Massachusetts - Federal Fiscal Year 2015

Composition of Federal Spending Awards to Massachusetts FFY 2008 - 2015

SOURCE: <http://www.usaspending.gov> as of 07/24/16. Federal fiscal data reporting is not complete until January of the following year due to the three month lag in DOD reporting. Federal Contracts. The table and graph below compare the annual summary of federal contracts performed in Massachusetts to the total contracts awarded by the federal government. In FFY 2015, the latest full year available, 3.0 percent of all federal contract work was performed in Massachusetts. This is slightly more than the 2.9 percent average it has been receiving over the last eight years.

The following two pages summarize the federal contracts by top products or services, funding agencies and sub agencies, contractors and sub-awardees, over the long-term and the latest complete federal fiscal year. The work was primarily performed in Massachusetts and the vendors who were awarded the contracts may or may not have been located in Massachusetts.

<i>Federal Contracts Performed in Massachusetts as a Percent of all Federal Contracts</i> (in millions of 2015 adjusted dollars)					
Federal Fiscal Year	Massachusetts	MA percent increase from previous year	MA portion of all federal contracts	U.S.	U.S. percent increase from previous year
2008	\$14,484		2.4%	\$595,877	
2009	\$17,972	24.1%	3.0%	\$597,532	0.3%

SOURCE: <http://www.usaspending.gov> as of 07/24/16. Annual federal fiscal data reporting is not complete until January of the following year due to the three month lag in DOD reporting.

State Revenues. Taxes collected by all states in FY 2014 totaled \$866.8 billion, 0.7 percent more than FY 2013. Massachusetts collected \$25.3 billion in FY 2014, 3.9 percent more than in FY 2013. Massachusetts ranked ninth in the nation in total taxes collected in 2014, up from tenth in 2013.

In FY 2014, the national average of tax collection from individual income tax and sales and gross receipts tax was 83.4 percent of total revenue. Massachusetts collected most of its revenue, 52.5 percent, from individual income tax while overall states collected 47.5 percent of their revenue from sales and gross receipts tax. Sales and gross receipts tax accounted for 31.4 percent of Massachusetts's nearly one billion in new revenue in 2014 and 47.5 percent of all U.S. state's \$5.8 billion in new revenue. Seven states do not have an individual income tax.

FY 2014 State Revenues by Type

SOURCE: U.S. Census Bureau, Governments Division.

NOTES: Other: Licenses, death and gift, severance, documentary and stock transfer and other NEC. Shares of total based on inflation-adjusted dollars (\$2015).

State Lottery Proceeds. Massachusetts ranked third in revenue, \$4.64 billion, and second in prize money awarded, \$3.59 billion, among the 43 states with lotteries in FY 2013. Massachusetts lottery revenue decreased 0.8 percent from the previous year.

FY 2013 Apportionment of Lottery Funds

SOURCE: National Association of Realtors and Massachusetts Association of Realtors. The Massachusetts sales price reflects only that of single-family homes. Sales prices of the other regions represent the average of both single- and multi-family homes. Data were presented in previous quarters in nominal dollars but are now presented adjusted for inflation.

Electricity Prices, Supply and Capacity by Source. Massachusetts had the sixth highest electric rate in the country in 2014, 15.37cents per kilowatt hour in 2015 dollars, while the U.S. average was 10.45. Adjusted for inflation, this was an increase of 4.1 percent for Massachusetts and an increase of 2.0 percent for the U.S. from the previous year. Massachusetts electric utilities generated \$8.4 billion in revenue in 2014. This was 2.6 percent more than in 2013, while they sold 1.4 percent less electricity. The Massachusetts Net Electricity Trade Index, which represents the state's electricity self-sufficiency, was 0.55 in 2014, the latest data available. In 2014, 59.4 percent of Massachusetts electricity was generated by burning natural gas, our top fuel source for power generation.

SOURCE: U.S. Department of Energy, http://www.eia.doe.gov/cneaf/electricity/st_profiles/massachusetts.html.

NOTE: Massachusetts restructured the electric utility industry to establish consumer electricity rate savings by 03/01/98.

Electric Power Generation by Primary Energy Source, 1990 to 2014

SOURCE: U.S. Dept. of Energy, <http://www.eia.doe.gov/>; state electricity profiles.

NOTE: Other includes batteries, chemicals, hydrogen, pitch, purchased steam, sulfur, tire-derived fuels and misc. technologies. Pumped storage is omitted from the graph because it represents the storage of power generated elsewhere rather than newly generated power.

Travel and Tourism. The Massachusetts Office of Travel and Tourism (MOTT) reported a 2.9 percent decrease in 2015 museum and attraction attendance compared to 2014, with 10.4 million visitors. Museum attendance was up 17.7 percent in April 2016 for the calendar year compared to April 2015. For May FY 2016 year-to-date, net room occupancy tax collections totaled \$222.4 million, a 7.6 percent increase from the same period in FY 2015.

Transportation and Warehousing. Massachusetts's major air and seaports are managed by the Massachusetts Port Authority (Massport), an independent public authority. Based on total passenger volume data for calendar year 2014, Logan Airport was the most active airport in New England and the 18th most active in the U.S. according to the Federal Aviation Authority. Massport reported that as of June 2016 year-to-date, total airport flight operations were up 7.9 percent and total airport passengers were up 9.2 percent from the same period in 2015. According to the FAA, in calendar year 2014, Logan Airport ranked 25^h in the nation in total air cargo volume. As of June 2016 year-to-date, Massport reported the airport handled 293.9 million pounds of cargo; a 1.5 percent decrease from 2015. Massport reported that total express mail was down 0.5 percent from the same period in 2015. Please refer to the Aviation Activity charts on the following page.

Massport's Port of Boston properties processed 237,166 full TEUs (twenty-foot equivalent units) of containerized cargo in 2015, an increase of 10.7 percent from calendar year 2014. It also processed 59,995 automobiles, a decrease of 53 automobiles, and 328,305 cruise passengers, a 4.0 percent increase, compared to 2014.

The Army Corps of Engineers reported Massachusetts total waterborne cargo shipped or received in 2014 decreased by 0.7 percent to 18.7 million short tons from 2013. Waterborne cargo in New England decreased 0.9 percent while the U.S. increased 3.1 percent. Please refer to the Waterborne Tonnage by State charts on the following page.
